

IVR™ INTELLIGENT VIDEO RACK™

Advance your threat detection and security capabilities by transforming your unintelligent CCTV system into a powerful, intelligent video security system.

CENTRALIZED DEPLOYMENT OF INTELLIGENT IP VIDEO

The Phoenix Intelligent Video Rack provides a centralized solution for implementing intelligent video into existing video surveillance systems.

The Intelligent Video Rack (IVR) is a 2U standard 19" rackmount chassis with 10 bays for a central deployment of Phoenix Standard Intelligent Video Modules. The IVR has "smart" power distribution and redundancy – a must for any centralized video detection device. Power is individually applied to each module enabling you to add and remove modules without shutting down the device.

IVR TECHNICAL SPECIFICATIONS

Enclosure: 2U Rackmountable Storage case

I/O: 10 Bays for Phoenix IVM Standard modules

Input Voltage: 100-240 VAC, 50/60 Hz

Power: Redundant, Hot Swappable

Mounting: Rack Mount, Desktop

Temperature: 0°C to 50°C (Operating)
-40°C to 85°C (Storage)

Dimensions: L x W x H: 19.0" x 10.3" x 4.7"
(482.6 x 261.6 x 119.4 mm)

Weight: 11 lbs (4.99 kg) IVR Only
18 lbs (8.16 kg) IVR with 10 IVMs
